

Classic FILTERS

Classic Filters manufacture bonded microfibre filter elements and the associated filter housings. They are suitable for a variety of gas and liquid applications and are used in a wide range of industries around the world.

“...suitable for a wide variety of gas and liquid applications”

Our disposable microfibre filter elements are extremely efficient as well as being low cost. There are a number of benefits with this type of element and offer high flow rates with very low pressure drops.

“...high flow rates with very low pressure drops”

All products conform to industry standard sizes and grades, being completely interchangeable with other manufacturers filter housings and elements. As well as the disposable type elements we also have a range of stainless steel & PTFE elements and PTFE porous membranes.

“...development of products is customer driven...”

The comprehensive product range enables a greater flexibility for customers because of the wider choice of standard designs. The development of new products is customer driven and our engineers work closely with OEM customers and end-users to solve their problems.

Special housings and filter elements designed and produced in-line with customer requirements and specifications are always available. We are here to find a solution to your filtration problem.

Local service is important so we have a global distributor network that offers unbeatable delivery times and local customer service.

“...global distributor network offers local service...”
