

Special Housings and Elements

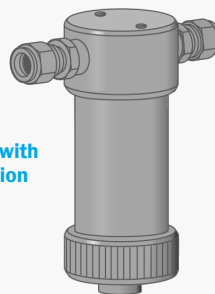

Special Designs

As well as our extensive range of standard housings we can also produce custom made special housings and filter elements.

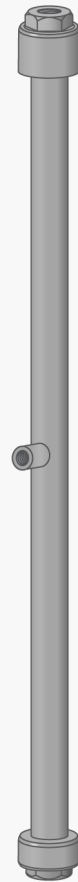

Our designers and engineers work closely with OEM customers and end-users to design and produce housings in-line with any requirements or specification.

Shown here are typical examples of special housings.

applications

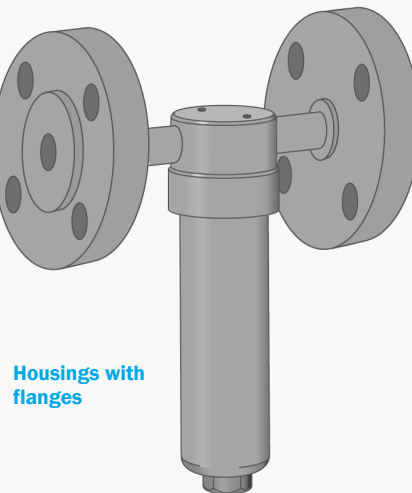

Special Materials

We can also supply our standard designs in a wide range of exotic materials including Hasteloy, Monel, Titanium, Inconel, Brass and many others.

Special Ports

Housings are stocked with NPT threaded ports as standard, but BSPP, BSPT and SAE threads are available.

All types of flange connection can also be supplied.
