

# SS216 Series Housings

**316L Stainless Steel  
Pressure, 200 Bar  
Ports, 1/4" or 1/2"  
Element, 25.64.□**

The SS216 series filter housings are specified for 200 Bar 1/4" line size applications and for 1/2" applications where response time must be kept short. If the flow rate or contamination is high, or where service intervals must be kept as long as possible, SS236 series housings should be considered. For applications less than 100 Bar see the SS212 and SS215 series and for over 200 Bar see the SS218 series.

Standard housings have NPT ports and include Viton gaskets. Other gaskets types are available as an option. BSPT and BSPP port types are also available.

The housings are free from welds and comply with NACE MR-01-75.
