

Materials Polyamide & PVDF
Pressure Up to 8 Bar
Ports 1/4" or 6mm Spigots
Adsorbers Various

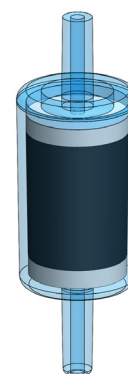

Disposable In-Line Adsorbers (DIA) consist of polyamide or PVDF bodies filled with granular adsorption material with integral inlet and outlet filter pads. Four body sizes are available giving a range of volumes.

Flow rates are the same as for grade 5 elements in the same size bodies. However, with adsorption more important considerations will be the volume of adsorbent and the contact time.

A range of adsorber materials are available, these are listed below. Replace the □ in the part number with the type required.
