

Materials	316L Stainless Steel
Pressure	100 Bar
Ports	1/4 or 1/2"
Filter Disc	FD.64.□

SW205 housings are designed to remove particulates from liquid samples. The inlet port is angled to create a 'cyclone' effect against a flat stainless steel filter disc. The sample flow passes through the filter to the outlet and the rest of the flow passes to the bypass port.

The housing design allows a quick change of the filter disc as all the line connections are arranged in the body of the housing and the threaded cap means no tools are required for access.

Standard housings have NPT ports and include Viton seals. Other seal types are available as an option. BSPT and BSPP port types are also available.

The housings are free from welds and comply with NACE MR-01-75.

Mounting Bracket	MB.SM206	MB.SM206

Notes

- (1) Above 200°C the pressure rating is reduced, consult us the exact rating at any specific temperature
- (2) Maximum temperature 200°C using standard seal
- (3) Material abbreviations, 316L SS = 316L Stainless Steel
- (4) Add suffix for other seal types, PTFE = .T, Chemraz = .C, Nitrile = N, Kalrez = .K, EPDM = .E, Silicone = .S, (e.g. SW205.221.T)
- (5) Replace the □ with the filter disc grade required, e.g. FD.64.S20V
