FF211 series filter housings are specified for 1/4" & 1/2" line size applications where a PTFE material is required. FF111 or FF121 series housings should be considered for applications where response time is important. Where a longer service time is required the larger FF231 series housings are available.

Standard housings have NPT ports and a Viton seal. Other seal types are available as an option. BSPT and BSPP port types are also available.

Due to the nature of PTFE, the housings are fitted with a 316L stainless steel collar on the outside of the head.
