## Heatable Filter Housing

<b>Materials</b>	<b>316L SS</b>
<b>Pressure</b>	<b>100 psi</b>
<b>Ports</b>	<b>1/8" or 1/4"</b>
<b>Element</b>	<b>12.32.□ to 25.178.□</b>

The HST series filter housings are designed for hot gas analysis, for example diesel exhaust. The housings can be heated by fitting a suitable heater to the body and installing it in a heated enclosure.

The bayonet connection allows fast filter element service even at operating temperatures.

The housings have the inlet and outlet ports in the side of the housing and a tie rod & element retainer.

Standard housings have NPT ports and include silicone seals. Viton seals are available as an option. BSPT and BSPP port types are also available.
